An area of low pressure tracking from the Plains northeastward into the Great Lakes brought a period of moderate to heavy snow to parts of central Illinois from the evening of January 6th through the morning of January 7th. Snowfall was greatest along and north of I-72...where 5 to 7 inch totals were common. Once the snow subsided, gusty northwesterly winds created considerable blowing and drifting across the area through the night of January 7th.

An upper-level disturbance tracked across the region on January 20th, bringing a period of freezing rain to central Illinois. Ice accumulations of one tenth to one quarter of an inch were common along and north of I-72. As a result of the ice, numerous traffic accidents and injuries were reported. One person was killed when they lost control of their vehicle and slid into an oncoming semi in Tazewell County. In addition, over 26,000 people lost power due to downed tree branches and powerlines.
