

Storm Data and Unusual Weather Phenomena - May 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
INDIANA, South Central				
PERRY COUNTY --- 2.1 N TELL CITY [37.98, -86.77]				
	05/08/09 13:05 EST	0		Thunderstorm Wind (EG 52 kt)
	05/08/09 13:05 EST	0		Source: Law Enforcement
A tree was down and blocking Troy Ridge Road.				
CRAWFORD COUNTY --- LEAVENWORTH [38.20, -86.35]				
	05/08/09 14:58 EST	0		Heavy Rain
	05/08/09 14:58 EST	0		Source: COOP Observer
A COOP observer reported 1.32 inches of rainfall measured over a 45 minute period.				
While more widespread severe weather occurred south of the the Ohio River on May 8th, some thunderstorms across southern Indiana produced gusty winds with one report of damage in Perry County.				
ORANGE COUNTY --- 0.7 N PAOLI [38.56, -86.47]				
	05/15/09 15:45 EST	0		Hail (1.75 in)
	05/15/09 15:45 EST	0		Source: Amateur Radio
ORANGE COUNTY --- 0.7 N PAOLI [38.56, -86.47]				
	05/15/09 15:56 EST	0		Hail (1.00 in)
	05/15/09 15:56 EST	0		Source: Broadcast Media
Severe thunderstorms produced up to golfball-sized hail across southern Indiana on the afternoon of May 15th. These storms developed ahead of a weak cool front moving across the region.				
PERRY COUNTY --- GATCHEL [38.05, -86.65]				
	05/30/09 21:08 EST	0		Hail (0.75 in)
	05/30/09 21:08 EST	0		Source: Law Enforcement
Isolated severe storms across southern Indiana and northern Kentucky along the Ohio River produced mainly small hail around a half inch in diameter, though one report of penny-sized hail was received from Perry County.				
PERRY COUNTY --- BRISTOW [38.13, -86.72]				
	05/30/09 23:09 EST	0		Hail (0.75 in)
	05/30/09 23:09 EST	0		Source: Trained Spotter
Scattered thunderstorms produced mainly small hail across southern Indiana and north central Kentucky. While most reported hail was a half inch in diameter or less one report of three-quarter inch hail came from Perry County in Indiana.				
KENTUCKY, Central				
EDMONSON COUNTY --- MAMMOTH CAVE [37.20, -86.10]				
	05/08/09 03:12 CST	0		Thunderstorm Wind (EG 50 kt)
	05/08/09 03:12 CST	0		Source: Law Enforcement
A large tree was blown down in the Mammoth Cave area. Time is estimated based on radar data.				
BARREN COUNTY --- 1.8 SE RED CROSS [37.00, -86.05]				
	05/08/09 03:30 CST	0		Thunderstorm Wind (EG 52 kt)
	05/08/09 03:30 CST	0		Source: Broadcast Media
A roof was blown off of a front porch and a tree was blown down in Breckton.				
WARREN COUNTY --- 0.9 NW BOWLING GREEN [36.99, -86.44]				
	05/08/09 03:41 CST	0		Thunderstorm Wind (EG 50 kt)
	05/08/09 03:41 CST	0		Source: Broadcast Media

Storm Data and Unusual Weather Phenomena - May 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
A tree was downed on U.S. 31W north of Bowling Green.				
WARREN COUNTY --- 0.9 SE SMITHS GROVE [37.04, -86.21]				
	05/08/09 03:52 CST		0	Thunderstorm Wind (EG 50 kt)
	05/08/09 03:52 CST		0	Source: Broadcast Media
A tree was downed near the intersection of U.S. 68/80 and Highway 101.				
OHIO COUNTY --- 1.8 WNW FORDSVILLE [37.64, -86.75]				
	05/08/09 13:38 CST		0	Heavy Rain
	05/08/09 13:38 CST		0	Source: Trained Spotter
Spotter reported 4.5 inches of rain since midnight.				
HART COUNTY --- 5.0 ESE MUNFORDVILLE [37.25, -85.82]				
	05/08/09 14:02 CST		0	Thunderstorm Wind (EG 52 kt)
	05/08/09 14:02 CST		0	Source: Law Enforcement
A couple of trees and power lines were downed along Highway 88 near Hardyville.				
BARREN COUNTY --- 0.7 N HISEVILLE [37.11, -85.80], 4.2 E PARK [37.14, -85.69]				
	05/08/09 14:04 CST		0	Tornado (EF1, L: 6.17 mi , W: 30 yd)
	05/08/09 14:11 CST		0	Source: NWS Storm Survey
The EF-1 tornado tracked along a roughly 6 mile long intermittent path from northeastern Barren County into far northern Metcalfe County. It first touched down as an EF-0 tornado just northeast of Hiseville. The tornado then produced EF-1 damage along its path before lifting about one mile south of the town of Center in Metcalfe County. A home was damaged along with several out-buildings - including a well constructed barn which was destroyed - and numerous trees were uprooted. The tornado was 30 yards wide and ended seven minutes later at 311 pm CDT. Maximum winds ranged from 75 to 90 mph. No injuries or fatalities were associated with this tornado.				
METCALFE COUNTY --- 2.3 WSW SAVOYARD [37.11, -85.77], 1.0 SW CENTER [37.12, -85.69]				
	05/08/09 14:04 CST		20K	Tornado (EF0, L: 4.30 mi , W: 30 yd)
	05/08/09 14:11 CST		0	Source: NWS Storm Survey
This tornado first touched down in Barren County about one half mile north Hiseville before tracking into Metcalfe County. The tornado produced EF-0 damage along this part of its path, uplifting a pole barn and scattering it across a field. The tornado then lifted about one mile south of Center near State Highway 1243.				
METCALFE COUNTY --- CENTER [37.13, -85.68]				
	05/08/09 14:10 CST		0	Thunderstorm Wind (EG 61 kt)
	05/08/09 14:10 CST		0	Source: Law Enforcement
Very large trees were downed along Highway 1243.				
METCALFE COUNTY --- KNOB LICK [37.08, -85.68]				
	05/08/09 14:10 CST		0	Thunderstorm Wind (EG 61 kt)
	05/08/09 14:10 CST		0	Source: Public
Trees were downed along Highway 70 at 8202 Sulpher Well Knob Lick Road. A shed was also blown onto the road.				
BUTLER COUNTY --- MORGANTOWN [37.22, -86.70], 0.4 SSW MORGANTOWN [37.22, -86.70], 0.5 SSE MORGANTOWN [37.21, -86.70], 0.2 E MORGANTOWN [37.22, -86.70]				
	05/08/09 14:22 CST		20K	Flash Flood (due to Heavy Rain)
	05/08/09 14:22 CST		0	Source: COOP Observer
Water was running through the Tucks Apartments on Saw Mill Road.				
GRAYSON COUNTY --- 0.7 S CLARKSON [37.49, -86.22]				
	05/08/09 15:05 CST		0	Heavy Rain
	05/08/09 15:05 CST		0	Source: CoCoRaHS

Storm Data and Unusual Weather Phenomena - May 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
JEFFERSON COUNTY --- 1.7 NE SHIVELY [38.20, -85.80], 2.0 NE SHIVELY [38.20, -85.79], 1.7 ENE SHIVELY [38.19, -85.79], 1.3 NE SHIVELY [38.19, -85.80]				
	05/08/09 15:50 EST		0	Flash Flood (due to Heavy Rain)
	05/08/09 18:50 EST		0	Source: Broadcast Media

Seventh and Berry Streets were closed due to high water. Other intersections were closed due to high water. Manhole covers were blown off in some locations.

GARRARD COUNTY --- 1.4 N HACKLEY [37.65, -84.47], 1.7 SE NINA [37.65, -84.45]				
	05/08/09 15:55 EST		0	Tornado (EF2, L: 1.26 mi , W: 150 yd)
	05/08/09 15:57 EST		0	Source: NWS Storm Survey

The tornado first touched down in the Nina Ridge Road area three miles ESE of McCreary in Garrard County. The tornado caused EF-1 damage at this location before strengthening to EF-2 just before entering Madison County.

Near the intersection of Highways 1295 and 52 in Madison County, the tornado reached EF-3 intensity. Near this intersection, two adults were killed when the mobile home they were in was picked up and thrown by the tornado. The bodies were recovered from a nearby pond. Five other occupants of the mobile home, including three children, were injured. A female relative in a brick home just yards away from the mobile home received only minor injuries despite being pinned under a collapsed wall in the house.

The tornado weakened and lifted at times as it continued east across the county, but still caused significant damage. It tore much of the roof off a fire station on the south side of Richmond before moving over the Bluegrass Army Depot toward the community of Waco in the eastern part of the county. After doing extensive damage to mainly roofs in a subdivision of brick homes near Waco, the tornado destroyed a mobile home in the area, carrying two teenage male occupants of the home through the air before dropping them near an elementary school 300 yards away. The teens miraculously received only minor injuries. The tornado weakened significantly from this point on, doing only minor roof damage and downing trees as it continued eastward before lifting near the end of Drowning Creek Road.

The tornado was up to 150 yards wide with maximum estimated wind speeds up to 140 mph. Approximately 150 homes received damage, the most severe being several brick homes where only interior walls remained standing in the wake of the tornado.

MADISON COUNTY --- 1.9 SW KIRKSVILLE [37.65, -84.45], 1.5 NE BYBEE [37.75, -84.10]				
	05/08/09 15:57 EST	2	0	Tornado (EF3, L: 19.86 mi , W: 150 yd)

Three people were rescued after a walking bridge was washed away. The event occurred near KY 210 at the soccer field.

A long-lived bow echo that had produced widespread wind damage over southern Illinois moved east into Kentucky during the late morning hours. As it moved east, the system encountered a strengthening low-level jet across the Ohio Valley, which helped modify the motion of the line, resulting in training storms of extremely heavy rain that caused flash flooding. Individual storms developing ahead of the line continued to produce damaging winds, with two storms producing tornadoes, before the main area of convection moved through.

NWS damage surveys determined the tornado in south-central Kentucky to be EF-1 in intensity, while the east-central Kentucky was ranked as a strong EF-3. The EF-3 tornado resulted in two fatalities and numerous injuries.

The roof of this home was torn off by an EF3 tornado near Caleast in Madison County. Some of the interior walls framing the house also received structural damage and cracks. Nearly 150 homes in this subdivision sustained damage with many losing their roofs, outdoor patio decks, garages and even some cars were thrown into houses. Picture courtesy of Joe Sullivan, WCM, WFO Louisville.

LOGAN COUNTY --- 0.9 SW RUSSELLVILLE [36.84, -86.89], 0.9 SW RUSSELLVILLE [36.84, -86.89], 0.8 WSW RUSSELLVILLE [36.85, -86.89], 0.8 WSW RUSSELLVILLE [36.85, -86.89]
