#### WASHINGTON COUNTY --- 1.7 WSW FT CALHOUN [41.46, -96.06]

11/05/08 17:38 CST	0	Hail (0.75 in)
11/05/08 17:38 CST	0	Source: Trained Spotter

A narrow line of mini-supercell thunderstorms developed ahead of cold front over eastern Nebraska. The storms produced a few penny-size hail reports before they moved into western Iowa and weakened a little. A large upper level low pressure system that deepened over Nebraska during the overnight hours of November 5th and 6th pulled up warm and moderately moist air ahead of the cold front that crossed the region during the evening of November 5th.
