08/30/09 20:41 CST	0	Waterspout			
08/30/09 20:48 CST	0	Source: Law Enforcement			

Galveston Police Department reported a waterspout approximately 200 yards offshore from the Galveston seawall. Waterspout was confirmed by NWS personnel using images from Galveston beach webcams. This waterspout came onshore as a tornado near the intersection of Seawall Blvd. and 29th Street in Galveston.

Several strong thunderstorms formed late in the evening near Galveston Island along a nearly stationary surface front. A waterspout developed off the coast near Galveston Island before moving inland and doing damage as a tornado.

Wind gust was measured at Galveston Scholes Field.

Several strong thunderstorms formed late in the evening near Galveston Island along a nearly stationary surface front. A waterspout developed off the coast near Galveston Island before moving inland and doing damage as a tornado.
