✓ Upgraded to a heat warning or a heat advisory for the entire area.
Excessive Heat This Week

Key Points

Hazard(s):
- Excessive heat with afternoon and early evening heat indices of 100 to 108 degrees.

Areas Impacted/Timing
- All of the Missouri Ozarks and southeastern Kansas
- Wednesday through Saturday
- A front is expected to move through early next week with less humid air and lower heat index values (Monday?).

Impacts:
- Heat illness is possible for those spending prolonged time outside or for those more susceptible to heat, such as young children and the elderly.

Considerations/Actions:
- Plan for excessive heat in operations. Outdoor activities will be impacted.
- Monitor forecasts through our website [https://www.weather.gov/sgf/](https://www.weather.gov/sgf/) or [NWS Chat](https://nws.gov Chat) (approved account required).
